

▶ 营养米、快餐米智能生产方案

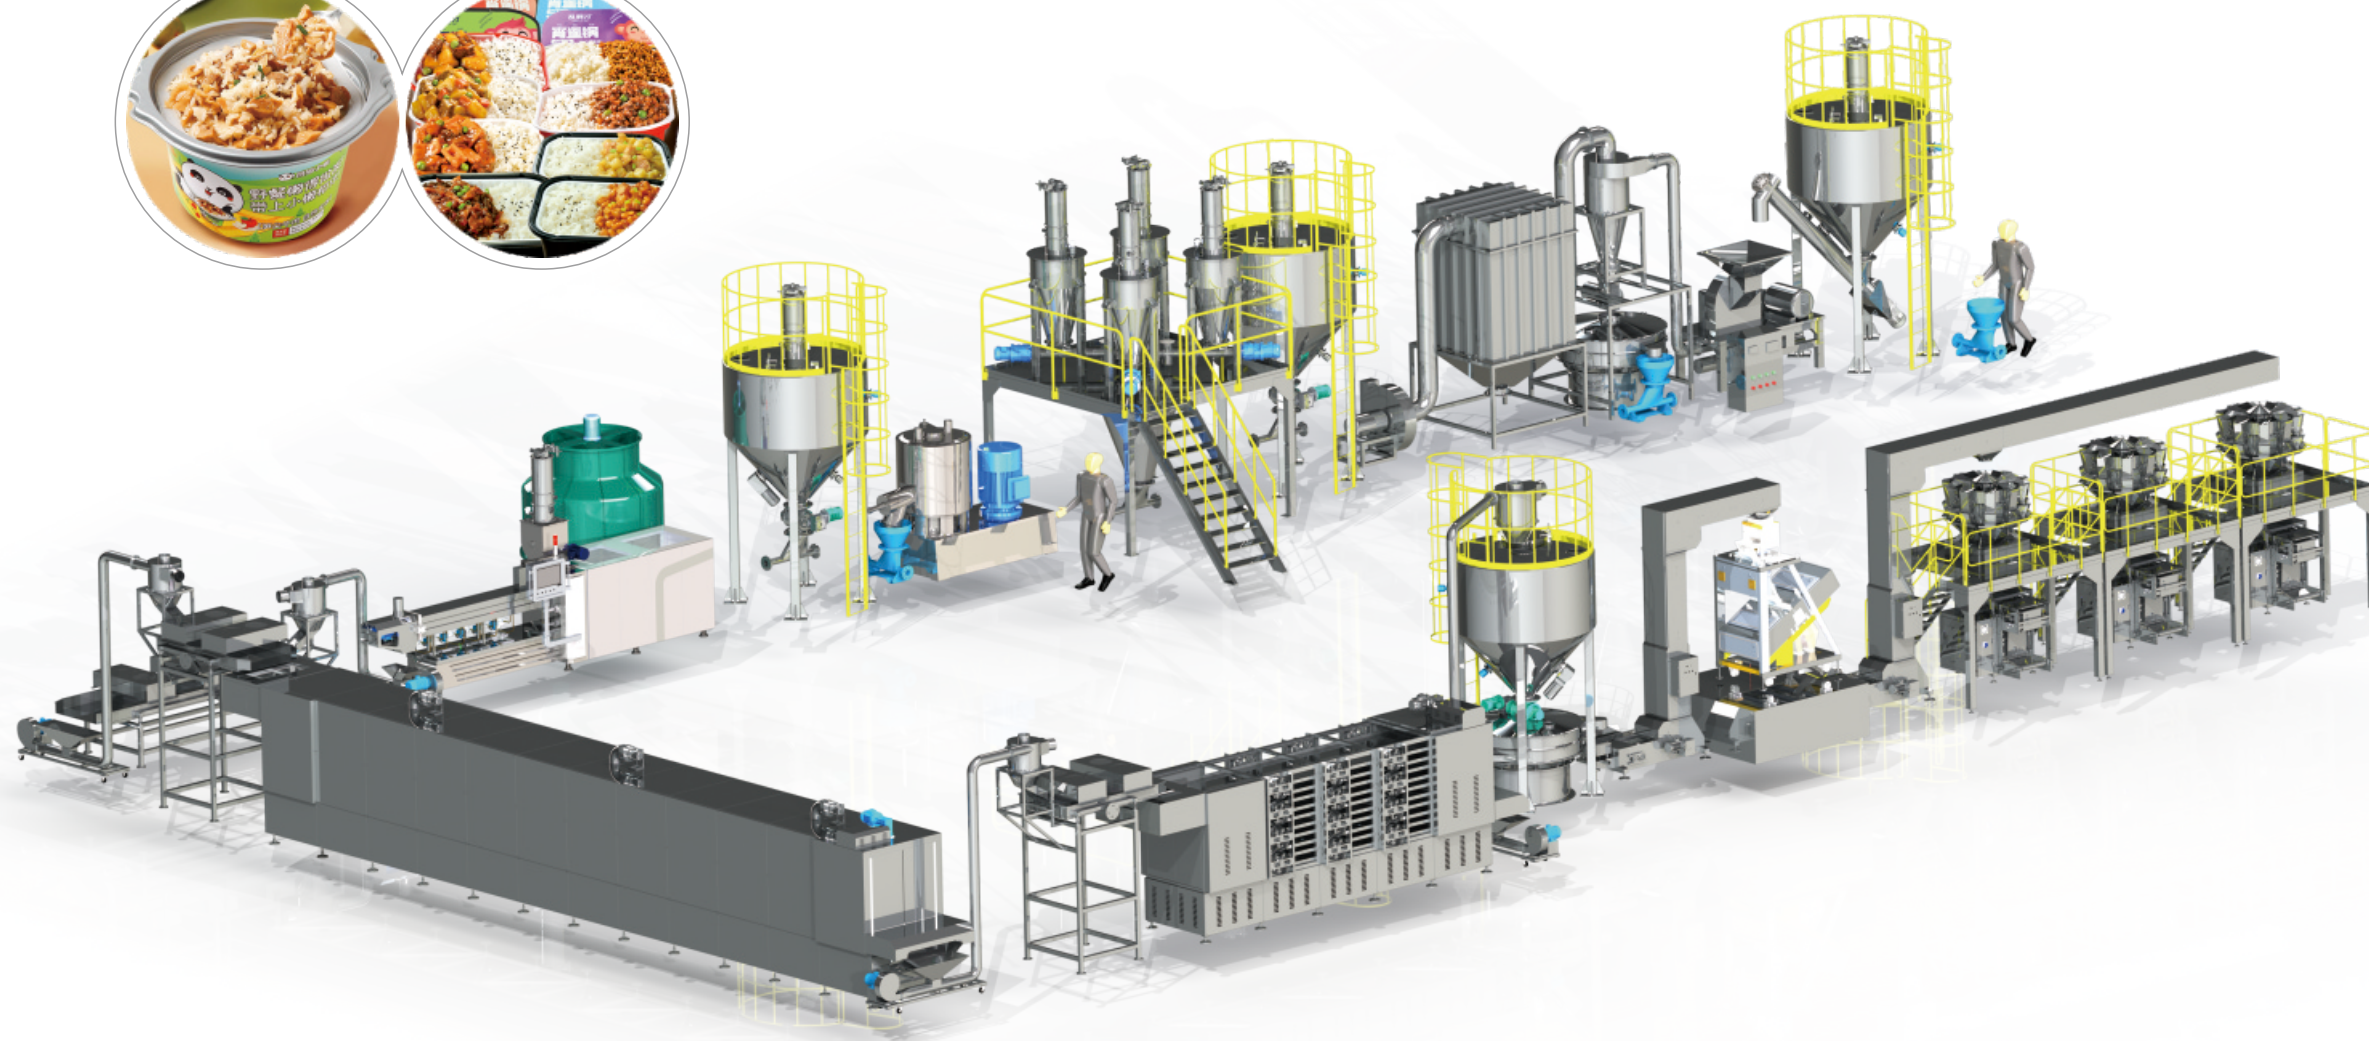

营养更全面、吸收更充分、食用更便捷

Nutritional Rice, Fast Food Rice Intelligent Production Solutions

Nutrition is more comprehensive, more fully absorbed, more convenient to eat

- ▶ **产品介绍:** 营养米利用挤压膨化技术, 将碎米和整米按照一定的比例进行混合、磨粉, 再次混合、加水, 经过双螺杆的挤压技术, 做成已经熟化的大米, 并且在混合过程中, 可以添加多种对人体有益的矿物质元素、维生素、营养元素等, 营养更全面、食用更便捷、更易于消化吸收, 深受消费者欢迎。
- ▶ **产品种类:** 可生产营养强化大米、人造大米、方便米饭、速食米粥、自热米饭等。
- ▶ **生产能力:** 300-500kg/h, 500-800kg/h, 800-1000kg/h, 1200-1500kg/h。

- ▶ **Product Introduction:** Meters using extrusion technology and the broken rice and whole rice according to certain proportion of mixing, grinding, mixing, add water, again through double screw extrusion technology, make it already ripening rice, and in the process of mixing, can add a variety of beneficial to human body mineral elements, vitamins and nutrients, etc., more comprehensive nutrition and food more convenient, more easy to digest absorb, It is very popular with consumers.
- ▶ **Product Category:** It can produce fortified rice, artificial rice, convenient rice, instant rice porridge, self-heating rice and so on.
- ▶ **Production Capacity:** 300-500kg/h, 500-800kg/h, 800-1000kg/h, 1200-1500kg/h.
